

Social Prescribing Satisfaction Questionnaire – year ending 31st March, 2016

At the end of the social prescribing intervention, a simple questionnaire is given to patients who complete it anonymously. This has been done when possible and when the final session is jointly agreed. The summary below is from 13 completed questionnaires.

	<u>Average score</u> (Yes – 3 No – 1 Not sure - 2)
1 Have you found the face-to-face sessions with the social prescribing co-ordinator helpful?	3.00 – all respondents said yes
2. Has working with the social prescribing coordinator made you feel better?	2.85 – two respondents were not sure, the rest said yes
3. Would you recommend social prescribing to others?	3.00 – all respondents said yes
4. Have you been to any groups or services suggested to you during session(s)?	2.15 – four respondents said no but had gained support required from the sessions

Comments

“It really helped me”

“It’s been nice coming here. It makes me feel a lot better that someone is listening to me. It’s good to talk to someone I can trust”

“It’s very helpful to have these sessions, everyone is so friendly and helpful”

“I really enjoy talking with the coordinator, she’s an understanding lady who provided advice and did what she could to help me out”
